PROFESSIONAL EXPERIENCE

Business Analyst | Notus Service Private Limited. | Noida, India | Oct 2025 – Mar 2026

- Developed and maintained 8+ Power BI dashboards for Finance, HR, and Operations leadership — improving KPI visibility and decision-making across departments.
- Automated reporting dataflows using Power Query, reducing manual data preparation effort by 35% and improving report turnaround time.
- Conducted trend, variance, and descriptive analysis on financial and workforce datasets, improving KPI adherence by 18%.
- Ensured data accuracy between dashboards and source systems, reducing reporting discrepancies by 15%.
- Gathered and translated business requirements into structured data models, KPI definitions, and reporting solutions across cross-functional teams.
- Prepared management presentations, performance summaries, and insight reports for senior leadership review.

Business Intelligence Intern | Celebal Technologies | Noida, India | Jun 2024 – Aug 2024

- Built 5+ Power BI dashboards for performance monitoring, reducing manual reporting by 3 hours per week.
- Performed SQL-based data extraction and modeling to feed BI reporting pipelines.
- Conducted variance and trend analysis, improving performance tracking accuracy by 12%.
- Documented BI workflows and data definitions to ensure governance and reporting consistency.

KEY PROJECTS

HR & Workforce Analytics Dashboard | Power BI, DAX, SQL

- HR dashboard tracking turnover, absenteeism, recruitment status, and performance KPIs for workforce planning.

Customer Churn & FMCG Analytics | Power BI, DAX, SQL, Excel

- Analyzed datasets to identify churn patterns and revenue optimization opportunities with data-backed recommendations.

Market Financial Performance Dashboard | Power BI, DAX, Power Query, SQL

- Executive dashboards with dynamic financial KPIs, scenario modeling, and drill-through analysis for senior leadership.

SQL Chatbot for Data Querying | Python, Streamlit, LangChain, OpenAI

- AI-powered natural language interface enabling non-technical users to query structured databases independently.
